

# COLORKOTE™

## Reinventing the Art of Antifouling

### Tomorrow's Antifoulings Available Today

A new era of boat maintenance is here. Meet COLORKOTE, the next generation hull coating built with Sea Hawk DNA. Incorporating self-polishing, triple-biocide, low-leaching chemistry, vibrant colors and multi-season performance, this is more than an antifouling paint. It's hull protection done the Sea Hawk Premium Quality way.

# The Anatomy of Tomorrows Bottom Paint

**Triple-Biocide Antifouling Power** – Ecomea\*, Zinc Omadine, Copper Thiocyanate

**Vibrant Colors** – 6 Basic Colors can be mixed to create thousands of custom colors (see back page)

**Multi-season performance** in fresh, brackish and saltwater conditions

**California Air Quality Compliant** – 330 Grams per liter VOC

**Compatible with all hull types** – ideal for fiberglass, aluminum, and steel/iron hulls

## Appearance Like Never Before

Your boat says everything about you. From stem to stern, that special appearance you demand above the waterline will now extend below with your choice of up to 46,656 custom colors for the hull. Including Bright White and Deep Black, COLORKOTE gives a compelling reason to apply antifouling protection where it should be but may not have been because of looks. Like the hull of a center console for instance. Even though many are kept on lifts or high-and-dry, a bright white antifouling gives extra protection during peak boating seasons.

## Doing More with Less

COLORKOTE is the latest generation of antifouling protection. Building on decades of experience, its advanced chemistry is environmentally focused, leaching less biocide material with lower toxicity into the water and emitting less VOC into the air, yet proving highly efficacious in deterring both hard and soft marine growth. Suitable for fresh, brackish and saltwater, COLORKOTE exemplifies the adage that "less is more."

## Triple-Biocide Strong

The guiding principle behind COLORKOTE chemistry is to inhibit marine growth, both hard and soft, without sacrificing the ease of application or a vibrant appearance. That's why we employ a ground-breaking triple-biocide technology where the antifouling efficacy is greater than the sum of its parts. Each biocide synergizes with its counterpart to deliver performance previously unavailable from a cuprous oxide-free antifouling coating.

## The Well-Polished System

COLORKOTE antifouling paint polishes at a controlled rate presenting consistent biocide exposure to its surface over time. Unlike less sophisticated antifouling, COLORKOTE does not require saltwater to activate its polishing properties which makes it perform perfectly in fresh, brackish and saltwater conditions. Yet its durable finish enables COLORKOTE to last over multiple boating seasons while maintaining its brilliant appearance. COLORKOTE's resilient surface withstands trailering and can even be burnished to a high performance super smooth racing finish.

## White is the New Black

With the center console powerboat trend exploding and the size of center console boats expanding, boat owners are looking for premium hull protection during extended times in the water. However, they want to maintain the pristine white look of their hulls. COLORKOTE white antifouling paint is the ideal solution providing triple-biocide antifouling power to keep barnacles a bay yet being durable and able to withstand being hauled in and out of the water or trailering.

## Compatible with Every Hull Type

The next generation formulation of COLORKOTE enables application to virtually any hull type without the harsh effects of galvanic corrosion (sometimes referred to as dissimilar metal corrosion) when cuprous oxide in antifouling paint reacts with aluminum or steel/iron hulls causing these hull types to corrode prematurely. Because COLORKOTE is cuprous oxide free, it solves this problem yet provides powerful antifouling properties. This makes COLORKOTE the ideal hull coating for metal hulled vessels from steel hull yachts to aluminum pontoon boats.

## Hand Crafted Quality

COLORKOTE is hand crafted in small production batches from premium quality raw materials and is 100% quality inspected to assure uniform performance and color consistency from batch-to-batch.

## Every Sport Fisherman's Dream

The secret is out! More sport fishermen are applying fish patterns onto the bottom of their hulls to attract target fish species to their boats. Using the Sea Hawk Baitfish Stencil Kit with contrasting colors of COLORKOTE provides the attractive qualities sport fishermen require along with the antifouling properties they need. Easy to use Sea Hawk Baitfish Stencils make the process quick and easy.

# Bold Colors Block Barnacles

Available in six vibrant colors, COLORKOTE provides exceptional hull protection with a stunning appearance like no other bottom paint. 46,656 custom colors are possible by blending the base colors, including custom blended colors that coordinate with popular topside yacht finishes. Enhance and protect the style and longevity of your hull in a way that has never been available before with COLORKOTE triple-biocide antifouling paint.

## 6 Base Colors:

**COLORKOTE custom blended colors matching popular topside yacht finishes**

**AWLGRIP**  
Stars & Stripes Blue

---

1 Gal Blue  
1 Gal Red

**AWLGRIP**  
Sky Blue

---

1 Gal Bright White  
1 Qt Blue  
4 Oz Deep Black

**AWLGRIP**  
Flag Blue

---

1 Gal Blue  
2 Qts Deep Black

**AWLGRIP**  
Red Mahogany

---

1 Gal Red  
1 Qt Deep Black

**AWLGRIP**  
Medium Gray

---

1 Gal Bright White  
1 Pt Deep Black

## Upgrade Your Hull

Compatibility with virtually all bottom paints makes it easy to upgrade from old-school bottom paint to the foremost of tomorrow's antifouling, today.
