INDEPENDENT TESTS PROVE IS THE FINEST ANTIFOULING IN THE WORLD

Islands 77 Plus was developed as an alternative to tin-based antifouling paints to protect against the harshest marine environments. Using the newest biocide technology, a revolutionary polymer binder system produces an engineered biocide release that leaves no harmful effects on the environment. The result is a multi-season self polishing paint that provides equivalent protection to tin-based formulas.

ECKERD COLLEGE TEST AFTER 18 MONTHS

ST. MARTIN TEST AFTER 8 MONTHS

- advanced biocide release technology
- harder self-polishing polymer binding system
- highest grade of cuprous oxide available (more potent active ingredient)
- better color consistency for color matching (less shading issues)
- consistent viscosity = better flow and rolling ability in every gallon

TORTOLA TEST AFTER 8 MONTHS
