

# Finally, a *Powerful* Antifouling Paint that's **METAL-FREE**

**When it comes to antifouling technology, the future has arrived.**

Independent evaluations prove that Smart Solution™ is the best performing metal-free antifoulant available today.

And, with a 1-year guarantee, you have the promise of a clean boat bottom and you're *doing your part* to protect the environment!

# How it Works

**Sea Hawk Smart Solution™** is the most advanced antifouling technology available today. Not only is this product effective, but the carbon footprint is virtually nonexistent.

Our new technology is combined with a pharmaceutical grade biocide, Ecomea (2-(p-chlorophenyl)-3-cyano-4-bromo-5-trifluoromethyl pyrrole), (Tralopyril), to control hard growth. Within days, the coating creates a living surface much like the mucoprotein protective slime coat that covers the scales and skin of a fish. This slime coat acts as a defense against invasion by bacterial, parasitic and fungal pathogens. It protects the surface by preventing microorganisms from attaching when the boat is not in motion. This mucoprotein protective layer is easily cleaned leaving a smooth, foul-free surface. Our new technology combines protection from mother nature, along with science and technology that insures a limited carbon footprint.

# SMART SOLUTION™

*After one season, no hard growth on hull. Soft growth washes away with a garden hose.*

# Scientifically Advanced Antifouling Paint

CSR Marine, a highly-respected boatyard in Seattle, Washington, was excited at the prospect of finally having a metal-free antifoulant that actually works. They began using Sea Hawk Smart Solution in the waters of Puget Sound.

*"Besides being an effective bottom paint, Smart Solution will hopefully play a key role in CSR's attempt to encourage all boat-owners to start transitioning to the most powerful environmentally friendly anti-foulant."*

- Frank Ryan, **CSR Marine**

## Smart Solution™

Metal-Free – 4700 Series

Smart Solution provides equivalent performance to traditional antifoulants, but utilizes completely METAL-FREE biocides resulting in no bioaccumulation of heavy metals in the environment. The coating's reaction to water creates a slick film that encapsulates the hull, providing enhanced speed and premium performance against hard growth. This slick film allows soft growth to be easily cleaned.

Bio Boost Additive compatible

		
Bright Red 4701	Bright Blue 4702	Bright Green 4703
		
Black 4705	White 4710	Dark Blue 4730

## As Effective as Traditional Copper-Based Paint

## More effective than traditional methods

After a season in Buzzard's Bay, MA this drive's photo on the right reflects exactly the way the boat looked just as it came out of the water with no pressure washing. **Smart Solution™** was brush-applied to the lower drive, per application instructions. The upper drive section was painted with Trilux 33\* aerosol.

# SMART SOLUTION™

Oyster Bay Marine Center, Long Island yard boat with Smart Solution painted side-by-side with copper based paint.

# Proven Results in State Funded Efficacy Study

Product evaluation of Smart Solution™ was done at Dillon's Creek Marina in Island Heights, NJ through grants from the I BOAT NJ funded program. This Program seeks to benefit the boating public by promoting, improving and enhancing the marine industry in New Jersey.

*Smart Solution on sailboat after one season. Hard growth on non-painted running gear; none on the hull.*

*Police boat coated with Smart Solution after one season.*

*After one season, the Smart Solution slick film washes away with just a garden hose.*

*Sea Ray boat after one season with Smart Solution. No hard growth.*

*"Smart Solution has no heavy metals and is the most reliable product in terms of hardness and wear."*
