

The Proven Water-Based Antifouling SolutionSM

For over a decade MONTEREY Antifouling has been the proven leader in environmentally friendly water-based antifouling protection for vessels of all sizes and hull substrates.

Easy to apply with low viscosity, MONTEREY saves you time and money by getting your boat back in the water quicker. If you store your boat out of the water, this is the perfect bottom paint for your boat because the antifouling power of MONTEREY is not reduced by removal from the water. Compatible with most paints on the market, MONTEREY can be applied over most existing bottom paint in good condition.

The Science of Monterey

MONTEREY is a water-based semi-hard ablative coating that is easy to apply, emits low VOC's, yet contains the highest grade of cuprous oxide available. Its semi-hard ablative characteristics means it lasts longer, yet self-polishes itself to help keep your hull smooth and barnacle-free while providing a host of unsurpassed benefits.

- Low odor
- Easy cleanup with soap and water
- Supports Air Quality Management District standards
- More active ingredients than other antifouling in its class
- Ideal for marine professionals and DIY'ers alike
- *** The best written warranty available**

MONTEREY Water-Based Antifouling – FAQs

1. What type of boat hulls can MONTEREY be applied to?

Answer: *Fiberglass, wood and properly prepared steel and aluminum substrates.*

2. How many seasons of use will a typical boat owner get from a certified MONTEREY application?

Answer: *MONTEREY is a multi-season ablative coating. Service life is determined by a number of variables including number of coats applied, frequency of use, length of season, frequency and aggressiveness of cleaning.*

3. What type of coatings can MONTEREY be applied over?

Answer: *Most existing bottom paints in good condition. Please see our Compatibility Chart for reference on our Product Buying Guide which can be downloaded at www.SeaHawkPaints.com/literature*

4. How many coats of MONTEREY are recommended?

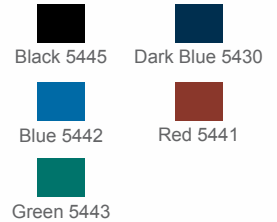

Answer: *Two full coats plus a third at the waterline and other high wear areas.*

5. How long does MONTEREY need to cure before the boat can be launched?

Answer: *12 hours*

6. What is the best way to achieve the optimum performance from a MONTEREY protected bottom?

Answer: *A regularly scheduled cleaning program accomplished by wiping the hull bottom paint surface with a soft cloth or brush to remove any surface contaminants.*

Criteria	Monterey	Hydrocoat*	Aqua**
Type	Water-based Ablative Antifouling	Water-based Ablative Antifouling	Water-based Ablative Antifouling
Colors	Black, Dark Blue, Blue, Red, Green	Black, Blue, Red, Green	Black, Blue, Red, Green
Cuprous Oxide	54.60%	40.30%	46.45
Volume Solids	44%	40%	37%
Theoretical Coverage (1.5 Mil Dry)	470.5	427.7	395.6
VOCs (g/l max)	78	150	150
